Western | Center

University of California
Agriculture and Natural Resources

United States
Department of
Agriculture

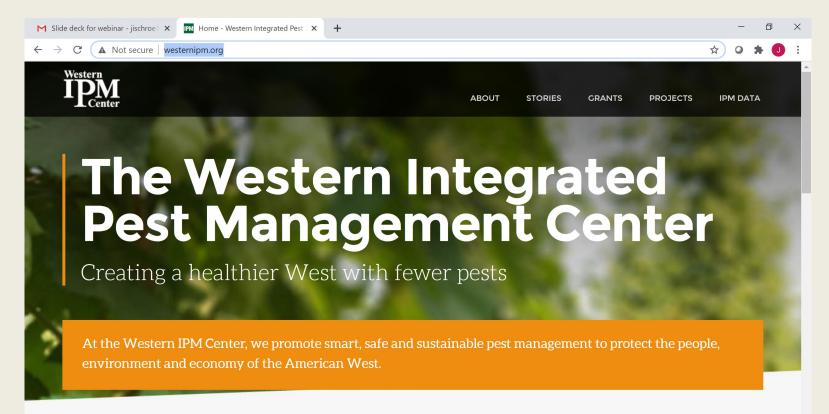

National Institute of Food and Agriculture

Applications are due by 5 p.m. PST, Friday, December 8, 2023

Questions? contact Jill Schroeder at jischroe1@gmail.com

Request for Applications

- Where can I find the RFA?
 - Western IPM Center October or November
 Newsletter
 - <u>http://westernipm.org/</u>

Key items to consider and address

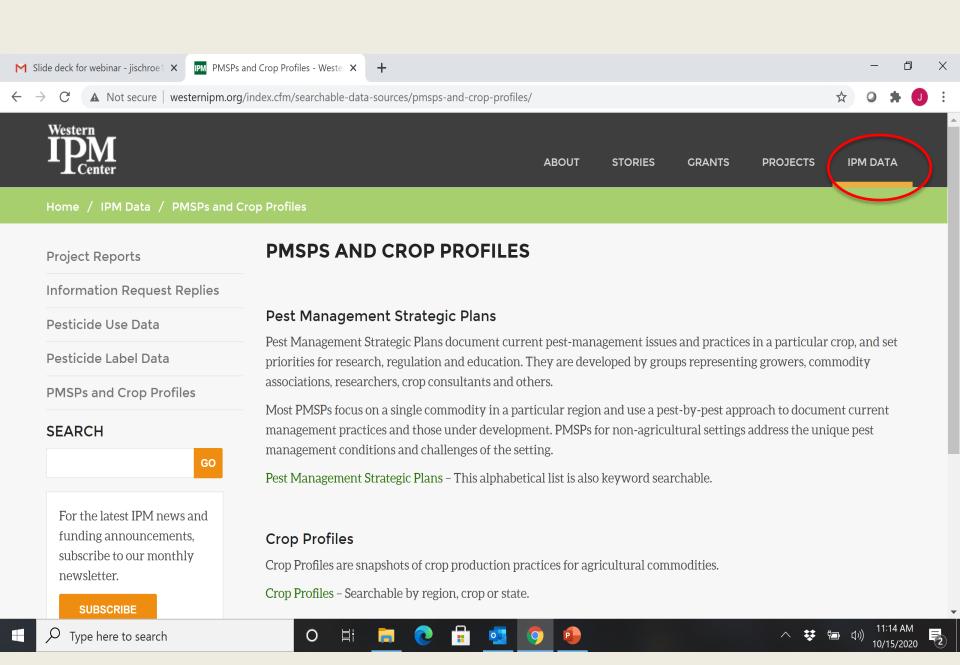

- WIPM Center regional priorities
- Stakeholder priorities
- Stakeholder engagement who is your audience?

Center Regional priorities

- IPM tools to address invasive, resistant or emerging pest problems
- Pest issues identified as Center priorities by stakeholder groups in the West
 - listed on page 2 of the RFA
 - <u>http://westernipm.org/index.cfm/center-grants/priorities/</u>
- Note: need to discuss in proposal narrative; not just list in application form.

Stakeholder priorities

- Pest management strategic plans
 - <u>https://ipmdata.ipmcenters.org/</u>
- Recommendations from Western Extension,
 Research and Academic (WERA) groups
 - National Information Management & Support System (NIMSS) available at <u>www.nimss.org</u>)
- Reports published by stakeholder groups such as commodity boards
- Letters of support from stakeholders

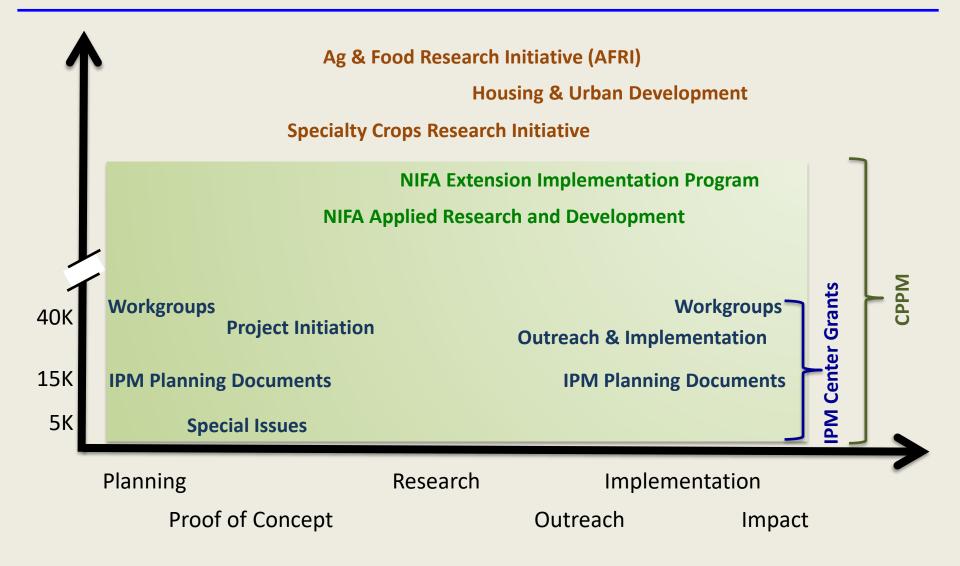

Stakeholder Engagement

- Describe in proposal narrative
 - Who is your audience?
- Provide letters of support from key stakeholders
 - Documents priorities/need
 - Documents engagement

Three (3) grant types (\$40,000 budget maximum per proposal)

- Grant types see p. 4 of RFA for descriptions
 - Project Initiation
 - IPM Workgroups
 - Outreach and Implementation
- Proposal timeline
 - 1 year projects
 - Start date March 1, 2024; end date February 29, 2025
- All three types are scored together

How the different grant categories fit into an overall program

Proposals must demonstrate regional scope

- The Center grant program seeks to support collaboration among states, islands, territories and First Nations
 - projects should have participants from multiple states, islands, or First Nations [can be a state and a tribe within that state]
 - or clearly demonstrate that the project will have regional benefit
- Exceptions are allowed only when the project director can <u>document</u> that the host/pest combination occurs only in one state

- See *page 5* of RFA for score sheet
 - Reviewers will refer to this score sheet to find scoring criteria for each proposal type and guide their reviews.

- Preparation (10 pts)
 - Information is clearly presented
 - Meets all format requirements and all forms are included

- Problem & Justification (20 pts)
 - How big of a problem is this for the REGION?
 - Is the project type identified?
 - How will the project address the Center priorities (p. 2 RFA)?
 - Have the Pis documented the stakeholder priorities and needs — are they working with these stakeholders?
 - How will the project integrate into your overall IPM program and goals?

- Potential for success (25 pts)
 - Criteria vary by project category (p. 5 RFA)
 - Objectives outline a logical solution to the problem
 - Procedures/plans are linked to the objectives and are likely to address the problem.
 - Timeline seems reasonable for outputs and outcomes – can the project be successfully accomplished within the 1 year funding cycle?

- Underserved stakeholders (10 points)
 - Does the project engage with and serve needs of historically underserved stakeholders?
 - Project leads are from one of these groups OR project involves members of this community.
 - Will this project include groups not typically engaged with or who are not practicing IPM?
 - This includes limited resource and socially disadvantaged farmers/ranchers/landowners, and EPSCoR states.

- Underserved stakeholders (10 points)
 - Projects that are designed by or document connection with underserved groups will be credited in this category.
 - Explain how you identify yourself or the population you are working with as underserved?
 - Resources
 - RFA *p. 5*
 - Biden Executive Order On Advancing Racial Equity and Support for Underserved Communities Through the Federal Government
 - Section 2 provides further definitions to help you determine how you or your stakeholders fit

Rubric for Underserved Stakeholder Engagement (p. 6 RFA)

	Clearly Identified	Can be inferred	Not addressed
Stakeholder group(s)	2	1	0
Stakeholder participation*	2	1	0
Resources or effort directed to stakeholders	2	1	0
Stakeholder letters of support**	2	1	0
Stakeholders are traditionally underserved***	2	1	0
*Stakeholders are listed as collaborators or key personnel			
**Letters of support on organization letterhead – 2 pts; email correspondence -1 pt, none – 0 pts			
***Underserved communities or persons those w/ limited participation in USDA programs, EPSCoR states and socially disadvantaged groups			

This rubric will be used by the reviewers to determine the number of points (up to 10) awarded for the underserved criterion.

See https://www.nifa.usda.gov/history-usda-epscor-states to determine if your state is an EPSCoR designated state.

- Outputs and Outcomes (15 pts)
 - Outputs what will the project produce?
 - link to objectives
 - Who is(are) the target audience(s)
 - Outcomes are the changes that may be influenced by the outputs.
 - Collect data to document change in knowledge, behavior, or condition OR collect baseline data to later evaluate change in knowledge, behavior or condition
 - Outcomes relate to WIPM Center priorities

- Outputs and Outcomes (15 pts)
 - Logic Model is an excellent tool to demonstrate the connection between different project pieces (https://logicmodels.ipmcenters.org/)

 - The program does NOT require that you include a logic model in your proposal.

Generic Logic Model for NIFA Reporting

(This model is intended to be illustrative guide for reporting on NIFA-funded research, education and extension activities. It is not a comprehensive inventory of our programs.)

Situation

Inputs

Activities

Outputs

Outcomes

Knowledge

Actions

Conditions

Description of challenge or opportunity

- Farmers face increasing challenges from globalization
- Opportunity to improve animal health through genetic engineering
- Insufficient # of trained & diverse professionals entering agricultural fields
- Youth at risk
- Invasive species is becoming an increasing problem
- Bioterrorism
- Obesity crisis
- Impaired water quality

What we invest:

- Faculty
- Staff
- Students
- Infrastructure
- Federal, state and private funds
- Time
- Knowledge
- The collection of stakeholder opinions

What we do (Activities):

- Design and conduct research
- Publish scientific articles
- Develop research methods and procedures
- Teach students
- Conduct non-formal education
- Provide counseling
- Develop products, curriculum & resources

Who we reach (Participation):

- Other scientists
- Extension Faculty
- Teaching Faculty - Students
- Federal, state & private funders
- Scientific journal, industry & popular magazine editors
- Agencies
- Policy and decisionmakers
- Agricultural, environmental, life & human science industries
- Public

Products, services and events that are intended to lead to the program's outcomes:

- Scientific publications
- Patents
- New methods & technology
- Plant & animal varieties
- Practical knowledge for policy and decision-makers
- Information, skills & technology for individuals, communities and programs
- Participants reached
- Students graduated in agricultural sciences

Occurs when there is a change in knowledge or the participants actually learn:

- New fundamental or applied knowledge
- Improved skills
- How technology is applied
- About new plant & animal varieties
- Increased knowledge of decision-making, life skills, and positive life choices among youth & adults
- Policy knowledge
- New improved methods

Occur when there is a change in behavior or the participant's act upon what they've learned and:

- Apply improved fundamental or applied knowledge
- Adopt new improved skills
- Directly apply information from publications
- Adopt and use new methods or improved technology
- Use new plant & animal varieties
- Increased skill by youth & adults in making informed life choices
- Actively apply practical policy and decision-making knowledge

Occur when a societal condition is improved due to a participant's action taken in the previous column.

For example, specific contributions to:

- Increased market opportunities overseas and greater economic competitiveness
- Better and less expensive animal health
- Vibrant & competitive agricultural workforce
- Higher productivity in food provision
- Better quality-of-life for youth & adults in rural communities
- Safer food supply
- Reduced obesity and improved nutrition & health
- Higher water quality and a cleaner environment

<u>ASSUMPTIONS</u> - These are the premises based on theory, research, evaluation knowledge etc. that support the relationships of the elements shown above, and upon which the success of the portfolio, program, or project rests. For example, finding animal gene markers for particular diseases will lead to better animal therapies.

EXTERNAL FACTORS - A brief discussion of what variables have an effect on the portfolio, program or project, but which cannot be changed by managers of the portfolio, program, or project. For example, a plant breeding program's success may depend on the variability of the weather...etc.

- Expertise and participation (15 points)
 - Biosketches (3 page maximum) for project directors and co-project directors
 - Project should involve end-users and students as appropriate
 - Describe how stakeholders will be involved

- Budget (5 points)
 - Budget is well defined
 - Costs are reasonable for the proposed project
 - Budget narrative fully justifies the budget items.
 - Narrative follows the order of the budget form

Supporting documents

- Tables and figures to support Problem statement (not required)
 - If included, reference these in the text
- Letters of support
 - Collaborator letters of intent or statements of work
 - Stakeholder letters of support
- Progress report for Workgroup <u>renewal</u> applications.

THINGS TO KEEP IN MIND

- Read the request for proposals carefully
- Projects should be regional in scope
- Think about/describe how this proposal fits into your long-term plan for the project or IPM program
- How does this proposal address priorities of the WIPM Center?
- Does the proposal address stakeholder priorities and document engagement with stakeholders?

Key items

- How to access submission site to register
 - <u>Https://grants.ipmcenters.org/</u>
 - This link can be found in the RFA
- Tutorials for submission site are found at
 - https://www.youtube.com/playlist?list=PLbGDFwpS4sk7LMIQjLNIcFCaj hsj9WVwR
- Tips from successful grant writers:

WSWS IPM Hour Episode 27: Western IPM Center New Grant Applicant Overview and Q&A

http://westernipm.org/index.cfm/about-the-center/publications/theipm-hour/

Key items

- Forms are available to download for administrative sections – complete each form in full and upload as PDF files
 - Grant application form
 - Needs to be signed by the Authorized Organizational Representative
 - Conflict of Interest List for PD and co-PDs
 - Current and Pending Support for PD and co-PDs
- All information for the narrative will be filled into form fields directly or by cut-and-paste.

Applications are due by 5 p.m. PST, Friday, December 8, 2023
