Hi,

Sue Blodgett asked me to respond your e-mail. The recommended rate of 2,4-D for pastures and rangelands is 1.5 pt to 2.9 qt of 4EC 2,4-D/A or 0.75 to 3.8 pt of 6EC formulation/A.

For more information you can check the herbicide label at <http://www.cdms.net/manuf/manufact.asp>.
