

Ethoprop Cancellation on Pineapple -- Information Request

On 31 May 2006 at 17:56, Teung.F.Chin@aphis.usda.gov wrote:

Dear Colleagues:

Bayer CropSciences is voluntarily canceling ethoprop EC on pineapples. I know that EPA has discussed ethoprop EC and bananas with Hawaii already. The granular formulation WILL REMAIN.

I just want to make sure that ethoprop EC is not needed for the pineapple growers.

I did not see ethoprop or Mocap mentioned in the crop profiles for pineapples for either Hawaii or the Northern Marianas

We need your feedback in the next week or two.

CROP PROTECTION

* Ethoprop, a Bayer CropScience Insecticide - EPA seeks public comments by June 23, 2006 on a Bayer CropScience request for voluntary removal from the product label of the emulsifiable concentrate (EC) formulation of uses in or on banana, cucumber, pineapple, and tobacco crops. EPA intends to grant this request at the close of the comment period for this announcement unless the Agency receives substantive comments within the comment period that would merit its further review of the request, or unless the registrant withdraws its request within this period. Upon acceptance of this request, any sale, distribution, or use of products listed in this notice will be permitted only if such sale, distribution, or use is consistent with the terms as described in the final order - Publicly available documents are to be posted in EPA docket identification number EPA-HQ-OPP-2002-0269 at <http://www.regulations.gov> - EPA OPPTS OPP Contact: Jacqueline Guerry, Special Review and Reregistration Division at 703 305 0024; fax: 703 308 8005; e-mail: Guerry.Jacqueline@EPA.gov - EPA May 24 Federal Register: <http://a257.g.akamaitech.net/7/257/2422/01jan20061800/edocket.access.gpo.gov/2006/E6-7932.htm>
