Subject: Ferbam: Use on Cherries and Grapes

The following information is provided to you from the Western Integrated Pest Management Center in response to your March 22, 2007 inquiry regarding the need to retain the use of ferbam on cherries and grapes. In our six-state region, comprised of Alaska, Idaho, Oregon, Montana, Utah, and Washington, ferbam is only registered in Oregon and Washington. Of the people I contacted no one reported use of ferbam on either cherries or grapes.

I hope that you find this information useful. I am attaching a contact sheet for your use should you have further questions.

Sincerely,

A handwritten signature in cursive script that reads "Jane M. Thomas".
