Subject: Watercress residue information

Tom,

I am confirming the contents of a phone message I left for you.

The records for the malathion/watercress residue trial have been pulled from our archives. And I must correct information I provided in our previous phone conversation. I apologize for the confusion.

The specifications for the malathion/watercress residue trial are:

Number of applications: 2 (two) applications for a single cutting

Application rate: 0.5 lb a.i./A (57EC formulation)

PHI: 7 days

Spray volume: 100 gal/A

Once again, I apologize for any confusion. If you have any questions please don't hesitate to contact either Mike Kawate (mike@hpirs.stjohn.hawaii.edu, 808/956-6008) or me.

Thank you,
Cathy
