Washington, DC 20250-0315

The following information is provided to you from the Western Integrated Pest Management Center in response to your March 6, 2006 inquiry regarding the use of PCNB as a seed treatment. You asked if PCNB was an important seed treatment fungicide on barley, peas, rice or soybeans. In the six-state Pacific Northwest (PNW) region, comprised of Alaska, Idaho, Oregon, Montana, Utah, and Washington, the applicable crops are barley and peas.

No one that I contacted for this inquiry indicated that PCNB was used as seed treatment for either barley or peas. I am including a contact list should you have further questions. I hope that you find this information useful.

Sincerely,

A handwritten signature in cursive script that reads "Jane M. Thomas".
