Director, Western Integrated Pest Management Center
Director, Office of Pesticide Information and Coordination (UC Statewide
Pesticide Coordinator)
University of California
Davis, CA 95616-8588

[Attached is information from California regarding PCNB.](#) I am still awaiting replies to Kent Smith's earlier request specifically for cotton where seed may be treated and/or in-furrow treatments may be made (no other crops had use as both a seed treatment and in-furrow treatment). However, in the meantime I am sending you the attached table.

In the future, it would be most helpful if your requests are coordinated through USDA's Office of Pest Management Policy. The IPM Centers are available to respond to these questions if we are in the loop. The only reason that two of the four regional centers know about your request is that leadership (Steve Toth and I) were earlier responders. The other two centers are currently out of the loop regarding this question.
