Subject: Re: Permethrin proposed crop label changes

Rick,

I sent this out inquiry to my contacts and had no response on the crops indicated. I presume we have no major issues with the proposed changes.

Al

Dear Colleagues,

Here is another quick turnaround from OPMP. I guess my complaining to them about giving us 3 weeks is not having an effect.

Please see what you can do. Those in the PNW should coordinate replies through Jane Thomas.

Thanks.

Rick

Subject: Fwd: Fw: Permethrin proposed crop label changes

I know it is a quick turn around on this one but I just received the notice. All that is needed are comments on the proposed rates, etc. mentioned in the attached table. Please send this out to those commodities affected and send comments back to Jacqueline Query at EPA: Guerry.Jacqueline@epamail.epa.gov. This table was put together by the registrants and I include the original notice. Please respond by March 16th. I apologize for the short turn around time.

Wilfred
