RE: Terrazole (etridiazole) Comment
DATE: August 25, 2014

The following comment is provided by the Western Integrated Pest Management Center in response to EPA docket number EPA-HQ-OPP-2014-0414. The response includes information regarding terrazole use in California, Oregon, and Washington.

California

Terrazole is used by the ornamental greenhouse and nursery industries to manage Pythium and Phytophthora diseases, but is not on the University of California Integrated Pest Management recommended fungicide list for these diseases. Terrazole is not labeled for use on turf in California. California pesticide use report data for 2012 is in the attached table.

Oregon and Washington

Terrazole is useful to control Pythium and Phytophthora diseases in ornamental production in the Pacific Northwest. The efficacy is moderate to good but terrazole can be used in areas that have resistance to other fungicides or in rotation for resistance management.

I hope this helps. Please contact me if you need further information.

Sincerely,

Jim Farrar, Director
Western IPM Center
