Subject: Docket ID Number EPA-HQ-OPP-2014-0414

Comments in Response to *Registration Review; Pesticides Dockets* (Terrazole/Etridiazole)

The following comments are being submitted in response to the June 25, 2014 *Federal Register* notice regarding EPA's opening of the public comment period for the registration review of terrazole (formerly etridiazole). These comments are submitted on behalf of the Western Integrated Pest Management Center and provide input on of the use of terrazole on golf courses in Hawai'i.

Terrazole (etridiazole) products are used to control disease problems on **golf course turf (greens and tees)** in Hawai'i as follows:

- Diseases controlled by etridiazole.

 Diseases controlled include Pythium blight, cottony blight, grease spot, spot blight, root rot and crown rot.
- Application rates.
 Typically, terrazole products are applied within this range of rates (up to the maximum allowed on the products labels):
 0.0375 lb ai/1,000 sq ft (1.63 lbs ai/A) 0.0938 lb ai/1,000 sq ft (4.09 lbs ai/A)
- Application timing.
 Application is made at the first sign of disease.

An Equal Opportunity/Affirmative Action Institution

This information has been provided by extension staff of the College of Tropical Agriculture and Human Resources of the University of Hawai'i at Mānoa.
