Subject: Re: Carbofuran Information request

Rick,

I received only the following from Arizona and Southwest state partners on the Carbofuran information request:

Peter Ellsworth (UA): "I'm not aware of any major or critical uses for carbofuran in the crops listed in the document." Tom DeGomez: "I am not aware that anyone is using carbofuran in Arizona."

We have expanded our email list for these information requests recently, working with the Arizona Crop Protection Association. So this request went out to a good number of growers and pest managers in our state. No one indicated critical uses in the crops listed.

Al
