Hi Teung-

Here is some information on malathion and California rice production from the California Rice Commission.

The Central Valley Regional Water Board, Basin Plan requires a 4-day water hold for malathion on rice so the 24 or 48 hour water hold on the label would not be an issue for California rice growers.

Thanks-Jim

Hello Jim and Danesha:

Can we get feedback for FMC regarding label language for a 24 hour holding time on the flood water after malathion is applied on rice and watercress?

Jim: Cathy Tarutani, HI weighed in on watercress during reregistration in 2003 or so.

Danesha: I think watercress is grown in Florida as well.

Can we provide the information to EPA in two weeks?

Thanks in advance!

Teung
